

# CREIGHTON MODEL FertilityCare™ SYSTEM

## Provides Natural Procreative Education

- A healthy, morally acceptable alternative to artificial methods of birth control
- A life giving option for couples experiencing infertility

| Myths  | Facts   |
|--|---|
| 1. It is calendar rhythm   | 1. It is a new science, healthy & highly effective  |
| 2. It depends on regular cycles  | 2. It does not predict fertility based on history but on easy to identify signs. Couples know, on any day, if they are fertile or infertile. A woman does not have to have regular cycles   |
| 3. It requires temperature and complicated charting  | 3. No temperatures are required and the daily tracking is simple and easy to learn and interpret  |
| 4. Classes to learn the method are expensive and time consuming  | 4. Sessions are affordable and available regardless of ability to pay. It is easily learned, especially when compared to other methods. Sessions are available during daytime, evening, and some weekends.  |
| 5. Natural Methods interfere with intimacy and spontaneity   | 5. Couples report increased communication and growth in their relationship as a benefit of learning and using the System  |
| 6. Natural methods are not as helpful to achieve pregnancy as artificial reproductive technologies, like IVF | 6. Published studies prove that NaProTechnology, based on the FertilityCare System charting, is more effective than artificial methods like IVF   |
| 7. This is just another method of birth control only "natural"   | 7. The System respects life from the moment of conception and is always open to life. A couple's understanding and accepting the gift of life increases as they learn to appreciate and accept their God given signs of fertility and infertility |
